SchoolMedia, Inc.	P51653-002	Using Maps and Globes	Using Maps and Globes (DVD)	2004	DVD	Building on students' basic understanding of maps and globes, the more complex concepts of latitude and longitude are introduced. The equator, north and south hemispheres, Tropics of Cancer and Capricorn are defined and located down to minutes and degrees. The Prime Meridian, east and west Hemispheres, Time Zones, and the International Dateline come to life on a world cruise review.	\$47.95
SchoolMedia, Inc.	P50833-006	Understanding Plants Collection	Plant Parts and Their Uses	2000	DVD	Roots, stems, leaves, fruit, and seeds — plants have all the parts they need! Learn about each part of a plant and its purpose. Animations help students visualize important concepts like photosynthesis and water moving into roots and stems. On-screen children ask important questions, correct common misconceptions, and identify the parts of plants that we eat. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Intro and Song (2) Roots (3) Stem (4) Leaves (5) Flowers (6) Seed (7) Edible plant parts (8) Review (9) Music with Lyrics.	\$35.95
SchoolMedia, Inc.	P50833-007	Understanding Plants Collection	Plant Habitats Around the World	1998	DVD	Students discover a wide variety of plants and the environments in which they live — deserts, tundra, forests, mountains, etc. They will investigate and understand that plants have life needs (food, air, water, light, and a place to grow) and see how they fulfill these needs in these different climates. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50833-008	Understanding Plants Collection	Plant Lifecycles	2002	DVD	With the help of a friendly scarecrow, students identify the basic needs of plants. They learn how seeds grow into plants and that the plant goes through changes called a lifecycle. They witness each step as seeds germinate and grow into flowering plants which produce seeds that eventually germinate and grow again. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50833-009	Understanding Plants Collection	The Importance of Plants	2002	DVD	Students see and learn how plants are the basis of food chains and how they are capable of making their own food. Shows different species of plants and identifies how different plants are used for food, oxygen, clothing, and building materials. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50833-010	Understanding Plants Collection	How Plants Grow	1998	DVD	Students will investigate and understand that in order for seeds to germinate and grow they must receive certain basic needs — food, air, water, light, and a place to grow. Next, they are introduced to the parts of a plant and learn how plants produce their own food. They also see how plants and animals depend upon each other for growth. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Plant Parts (3) Plants make their own food (4) Seeds (5) Bulbs (6) Reproduction (7) Plants have needs (8) Plant habitats and life cycle (9) Plant Adaptations (10) Different kinds of plants (11) Fun Facts.	\$35.95
SchoolMedia, Inc.	P50834-009	Understanding Animals Collection	Animal Groups: Beginning Classification	2000	DVD	Mammals, Birds, Fish, Amphibians, Reptiles, and Insects. Simple explanations and vivid footage provide an excellent lesson in classifying animals. Discover that animals can be classified into groups by characteristics they have in common. Learn about the traits that help distinguish each group of animals and how these traits help them survive. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Insects (3) Reptiles (4) Amphibians.	\$35.95
SchoolMedia, Inc.	P50834-010	Understanding Animals Collection	Living and Nonliving Things	2000	DVD	Students learn that all living things have needs and some of these are air, water, and energy from food. They are shown how to tell the difference between living and nonliving things. They also learn that plants are living things and see how they meet their needs and how they move, grow, and change. Finally, they compare objects at home, in a pond, in a neighborhood, and on a farm, and group them as either living or nonliving. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Living Things (3) Nonliving things (4) Objects that seem like they're living (5) quiz (6) review.	\$35.95
SchoolMedia, Inc.	P50834-011	Understanding Animals Collection	Insect Lifecycles: Metamorphosis	2000	DVD	Students learn about simple metamorphosis, complete metamorphosis, and the entire insect lifecycle. Includes live, close-up footage of a painted lady butterfly, waxworm moth, silkworm, milkweed bug, and more. Detailed animations give students a unique perspective of the world's largest animal group. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction/Theme (2) The Amazing Lives of Insects (3) Simple Metamorphosis (4) Complete metamorphosis (5) Metamorphosis review (6) Life Cycle.	\$35.95
SchoolMedia, Inc.	P50834-012	Understanding Animals Collection	Insects	2000	DVD	Students discover what characteristics make insects different from all other animals. Learn that there are more insects than any other kind of animal on Earth. Watch the ways that special body parts help insects meet their needs for food, water, air, and shelter. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Identifying Insects (2) Three Body Parts (3) The Exoskeleton (4) Reproduction.	\$35.95

SchoolMedia, Inc.	P50834-013	Understanding Animals Collection	Animal Lifecycles	2002	DVD	Children learn that living things grow and change. They learn to compare animal parents and babies. They see that some animal babies do not look like their parents. From tadpole to frog, egg to chicken, caterpillar to butterfly, and puppy to dog, students are introduced to and learn the stages of the life cycles of animals. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50834-014	Understanding Animals Collection	Food Chain Mystery	2000	DVD	Follow the flow of energy through the food chain from the sun to producers, consumers, and decomposers. Vivid animations use a linear food chain and an energy pyramid to demonstrate how energy passes through the food chain. Other concepts include photosynthesis, predator-prey relationships, herbivores, carnivores, and omnivores. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Energy in habitats (3) Plants (4) Animals (5) Producers and Consumers (6) Herbivores, Carnivores, and Omnivores (7) Decomposers (8) More food chains (9) Energy pyramid and food web (10) Review (11) Conclusion.	\$35.95
SchoolMedia, Inc.	P50834-015	Understanding Animals Collection	Animal Features and their Functions	2000	DVD	Heads, tails, wings, feathers, fur, and claws. Discover how these and other parts of animals help them live in different habitats. Learn how to tell what kind of food an animal eats, based on the shape of its teeth. See that the different parts of animals help us determine where and how they live. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Animal Body Coverings (3) Movement (4) Eating (5) Animals and People are different.	\$35.95
SchoolMedia, Inc.	P50834-016	Understanding Animals Collection	Amphibians, Fish & Reptiles	1998	DVD	Go underwater to witness how over 20,000 different kinds of fish live. Visit the habitats of frogs, toads, snakes, lizards, and more. Learn how to distinguish between these three types of animals with this informative and interesting lesson. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P51654-002	Understanding and Making Maps: An Introduction	Understanding and Making Maps: An Introduction (DVD)	2004	DVD	Learn the connection of drawings to maps and models to globes as students see their community from above and begin to understand scale, relative position, direction...Loaded with definitions; symbol, compass rose, cardinal directions, key or legend ...and map essentials; title, date, legend and scale kids make a variety of maps and find locations on a simple grid map.	\$35.95
SchoolMedia, Inc.	P50804-009	U.S. History Collection	Native Americans: The First Peoples	1998	DVD	Examine the life-styles of Native Americans who lived in the Eastern Woodlands, the Great Plains, the Southwest Desert, the Pacific Northwest, and the Arctic. Witness what happened when the white man arrived with his different cultural beliefs. See how Native Americans live today in the United States. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50804-010	U.S. History Collection	Plymouth Plantation	2001	DVD	Students blast back in time to the original Plymouth Plantation of 1620, the first colonial settlement in southern New England. Follow along as they learn about daily life and culture, the roles of Pilgrim men and women, the voyage of the Mayflower, and the importance of the Mayflower Compact. Begin to understand that Thanksgiving for the Pilgrims was a daily practice, not just a feast held once a year. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50804-011	U.S. History Collection	Founding of Our Federal Government	2001	DVD	While George Washington was leading the Continental Army against the British, Thomas Jefferson was writing a document that would be used to declare America's separation from England—the Declaration of Independence. Students identify some of the people who fought for the rights of Americans. Once free, the planning of a new government began with the writing of our Constitution. Realize that our country's government is based on a constitution and learn the changes made to our constitution. Appreciate the significance of the Constitution. Learn the formation of the three branches of the national government. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50804-012	U.S. History Collection	United States Expansionism	2001	DVD	Students witness the expansion of America from the early colonies through the acceptance of Hawaii as our fiftieth state. Includes a look at the formation of the first 13 colonies, the French and Indian War, The Revolutionary War, The Louisiana Purchase, Florida and the Seminole Indians, The Westward Movement, The Mexican-American War, The California Gold Rush, Manifest Destiny, Oregon Territory, Alaska Purchase, and Hawaii. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50804-013	U.S. History Collection	Civil War	2003	DVD	Witness the conflict between North and South and the South's eventual secession that led to a rush to arms, pitting countryman against countryman. This program utilizes exciting re-enactments, artifacts, and interviews to explore key battles of the Civil War, life on the Northern and Southern home fronts, and the role of African Americans in the war. Concludes with the Emancipation Proclamation, the Battle of Gettysburg, and the fall of the Confederacy. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95

SchoolMedia, Inc.	P50831-007	Physical Science Collection: Primary	The Magic of Magnetism	1998	DVD	Why does a magnet stick to metal objects but not plastic? How can it pick up metal shavings but not wood chips? With the help of a magician, students learn all about magnetism. They discover what a magnet is, the properties of magnets, magnetic fields, and the types of objects that are attracted to magnets. Children learn what magnets are used for and in which simple machines they are found. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) What is a magnet? (3) Poles (4) Atoms (5) The earth is a magnet (6) Magnets push and pull (7) Kinds of magnets and uses of magnets (8) Review.	\$35.95
SchoolMedia, Inc.	P50831-008	Physical Science Collection: Primary	How Things Move	1999	DVD	Roll, slide, bounce, and spin! Discover many different ways objects can move. Give your students a preliminary lesson in physical science with this fun program designed to get children thinking about pushes and pulls. Students enjoy learning about position, movement, and the forces used to make objects move. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50831-009	Physical Science Collection: Primary	Properties of Matter, Part 1	2003	DVD	Come join us in the "matter kitchen" as we learn that our entire world is made of matter, including things we don't see, like the air we breathe. We learn to use our five senses to identify the properties of an object — size, weight, shape, color, and temperature. Students identify some of the tools used to measure the properties of matter. Finally, we learn that matter has mass and takes up space and that it can exist in different states — solids, liquids, or gases. DVD features include interactive quiz, slide show, video "clips" aligned to standards, on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Five Senses (3) Identifying Properties of matter (4) Matter Can (5) Matter Analyzer (6) Matter has mass (7) Matter takes up space (8) Solids, liquids, and gases (9) Review.	\$47.95
SchoolMedia, Inc.	P50831-010	Physical Science Collection: Primary	Simple Machines	1998	DVD	When a group of children attempt to move their play fort, they realize that six simple machines make the work much easier by changing either force or distance. They learn to identify real-world examples of simple machines including the lever, pulley, wedge, wheel and axle, inclined plane, and screw. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50831-011	Physical Science Collection: Primary	The Wonder of Sound	1998	DVD	Through instrument, voice, and graphics, students easily discover how sounds are produced and students learn how we hear. Vibration is demonstrated, and children experiment with the way sound travels — in the air, through the ground, and under water. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50831-012	Physical Science Collection: Primary	Properties of Matter, Part 2: Liquids, Solids and Gases	2003	DVD	Matter is everywhere — in everything! Appropriate examples and experiments make learning about matter easy and fun to follow. Learn that all matter has mass and takes up space, use the five senses to discover the properties of matter, and see how matter changes form. A catchy tune helps solidify important concepts. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Theme and Introduction (2) What is matter? (3) Forms of matter (4) Solids (5) Liquids (6) Gases (7) Matter can change forms (8) Review (9) Song.	\$47.95

SchoolMedia, Inc.	P50835-012	Physical Science Collection	Getting to Know Electricity	1998	DVD	Learn about electricity when Ben Franklin leaps out of the pages of a student's science textbook to help him with his homework. Using the latest computer graphics and experiments, Ben explains concepts such as lightning, static electricity, and simple, series, and parallel circuits. Discover the relationship between electricity and magnetism and learn that a variety of energy sources can produce electricity. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50835-013	Physical Science Collection	Simple and Compound Machines	1998	DVD	When "Hardware Hal" holds a "Simple and Compound Machines Sale" he demonstrates to his assistants the six simple machines: the lever, wedge, inclined plane, pulley, wheel & axle, and screw. Shows how these machines make work easier by changing force, direction, or distance. Machines in action and computer graphics illustrate the principles of work, effort, force, distance, power, friction, and much more. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50835-014	Physical Science Collection	Getting to Know Energy	2000	DVD	Energy is all around you. Learn about the many different types of energy and how energy can change form. Vivid examples illustrate how potential energy and kinetic energy are defined, and how one form of energy can change into another. Discover that energy never goes away and that it can only be transferred from one form into another. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) What is energy? (3) Work (4) Forms of energy (5) Potential and kinetic energy (6) Review.	\$47.95
SchoolMedia, Inc.	P50835-015	Physical Science Collection	Getting to Know Gravity	2000	DVD	Students learn about gravity. First stop — Earth — to discover how gravity affects people and things on this planet. Next stop — outer space — to learn how gravity affects other planets. This learning journey demonstrates the effects of mass on gravity and the difference between mass and weight in a way that is easy to understand and fun to watch. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50835-017	Physical Science Collection	Common Properties of Matter: Atoms, Elements & States	2003	DVD	Two students in search of ideas for a science project find help in a store like one they've never seen. Miss Dallerweg, the store owner, helps explain concepts like atoms and molecules. She also describes what mass, volume, and density are and how they are different, and the states of matter and how they change. With the insights and understanding the students gain from this experience, the science project turns out to be a big success. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50835-019	Physical Science Collection	Laws of Motion	1999	DVD	Isaac Newton himself shows students how gravity, friction, and inertia are related to mass, force, and momentum. Exciting graphics and re-creations allow students to see how Newton's laws of motion relate to real life. Experiments with roller blades, baseballs, and other common objects encourage students to make science exploration recreational. DVD features include on-screen teacher's guide and vocabulary plus chapter selections..	\$47.95
SchoolMedia, Inc.	P50835-020	Physical Science Collection	Changes in the Properties of Matter: Physical and Chemical	2003	DVD	Amanda's friend Kyle is having trouble understanding matter, but she knows just the thing to do. She takes him to "A Matter of Fact," an interesting store full of scientific things—and a peculiar storeowner to help them! Kyle learns all about the physical and chemical properties of matter, such as conductivity, magnetism, and combustibility. He finds out what mixtures and solutions are. Last, he learns about the physical and chemical changes of matter like rusting, tarnishing, and burning. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95

SchoolMedia, Inc.	P50808-014	Economics Collection	How Our Economy Works: All About Earning and Spending Money	2001	DVD	During this engaging video, students will learn that people work to earn money so that they can satisfy their basic needs and wants, and that everything we spend money on is either for goods or services. They learn what a job is and the difference between production workers and service workers. They are introduced to the concepts of saving and banks. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Producers (2) Income (3) goods and services (4) Consumers (5) Smart choices (6) Saving money (7) Wasting money (8) Review.	\$35.95
SchoolMedia, Inc.	P50808-024	Economics Collection	Learning about Money	2001	DVD	With the help of two friends, students learn that money has value and comes in many denominations (from a penny to a 100-dollar bill). Students will go inside one of our country's mints to discover how coins are made. Lastly, they will learn that every country has its own unique money and see some of the currencies used in different countries today. (1) Introduction (2) History of money (3) Currency (4) Where is money made? (5) How coins are different (6) Paper currency (7) Value (8) Review (9) End	\$29.95
SchoolMedia, Inc.	P50795-010	Earth Science Collection: Primary Grades	Learning about Natural Resources	2003	DVD	Reduce/Reuse/Recycle are meaningless words to students who do not have a clear understanding of the importance of Natural Resources. In this engaging production, students first learn about the three types of natural resources: inexhaustible, renewable, and nonrenewable. Next, we identify the earth's wide variety of natural resources – air, water, oil, coal, gas, forests/trees, soil, rocks, plants and minerals. Lastly we see how we use each of these natural resources in every day life. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Three kinds of resources (3) Inexhaustible resources (4) renewable resources (5) nonrenewable resources (6) Pollution (7) reduce, reuse, recycle (8) Conclusion.	\$35.95
SchoolMedia, Inc.	P50795-011	Earth Science Collection: Primary Grades	Landforms #1	1998	DVD	Take a ride in a "traveling machine" to learn about the form and function of landforms. Appreciate the beauty and utility of the world's natural features, and see how communities are made unique by the landforms around them. Highlights oceans, rivers, streams, mountains, hills, plains, valleys, plateaus, deserts, islands, and more! DVD features include interactive quiz, slide show, video "clips" aligned to standards, on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Mountains,(3) Hill (4) valleys (5) Bodies of water (6) lakes (7) Land near water (8) Desert Landforms (9) Plains (10) Review and Conclusion.	\$35.95
SchoolMedia, Inc.	P50795-012	Earth Science Collection: Primary Grades	The Importance of Water	1998	DVD	Students learn that water is essential to life. Discover many places that water can be found on Earth, and learn about the different forms of water in the ground and in the air. Follow the water cycle, and learn how clouds form. Understand many ways we use water including bathing, cooking, transportation, and food production. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50795-013	Earth Science Collection: Primary Grades	Rocks: The Solid Earth Materials #1	1999	DVD	With the help from a Rock Wizard and a little imagination, students discover that the Earth is made up of rocks, and rocks are made of minerals. Discover the three ways rocks are formed and many of the properties of rocks and minerals — like size, shape, color, and texture. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50795-014	Earth Science Collection: Primary Grades	Uses of Rocks and Minerals	1999	DVD	The rocks and minerals that form within the Earth are used to make many important materials. Watch how rocks are mined, processed, and then constructed into glass, cement, bricks, houses, roads, and other objects used in our everyday lives. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) What is a rock? What is a mineral (3) building materials and glass (4) Transportation (5) Gemstones (6) History of Rocks and Minerals (7) How rocks and minerals are taken from earth (8) Rocks that don't need to be processed (9) Rocks and minerals that have to be combined to be used (10) Mining (11) Review.	\$35.95
SchoolMedia, Inc.	P50795-015	Earth Science Collection: Primary Grades	Taking Care of Our Earth	1999	DVD	Students learn to care about their environment with the help of four animated characters as they take a tour of a landfill. Natural resources are identified and shown as students learn how important it is to conserve them. They also discover how reducing, reusing, and recycling benefit our environment, and how air and water pollution can hurt it. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95

SchoolMedia, Inc.	P50795-016	Earth Science Collection: Primary Grades	Weather: Changes and Measurement	1999	DVD	Discover that weather is the condition of the air outside, and learn the words we use to describe weather: sunny, cloudy, rainy, snowy, hot, and cool. Understand that the weather may change from day to day, but general trends in weather can be seen from season to season. Learn how the sun warms the Earth and other ways that weather forms and changes. See how tools like thermometers, weathervanes, and rain gauges measure and record these weather changes. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Intro (2) Weather and earth (3) Temperature (4) How temperature works (5) Wind (6) Water.	\$35.95
SchoolMedia, Inc.	P50795-017	Earth Science Collection: Primary Grades	The Four Seasons	2003	DVD	From the snow of winter to the first flowers of spring, see the wonder and magic of our changing seasons and the patterns of life. Students witness how changes in climate and weather affect their lives. They understand that weather changes seasonally, affecting the earth and the people who live on the earth. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50795-018	Earth Science Collection: Primary Grades	Getting to Know Soil	1998	DVD	Children learn all about soil during this video, when detective Terra Firma and his assistant Eartha the Earthworm dig below the surface to unearth the facts. Witness how soil is formed; the properties of sand, clay, loam soil, and their uses; and much more! DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$35.95
SchoolMedia, Inc.	P50832-008	Earth Science Collection: Intermediate Grades	Weathering and Erosion	2002	DVD	The surface of the land has undergone many changes over its history. Water, rain, snow, and wind — they all continually shape and form the Earth. Take students on a journey to discover how physical weathering, chemical weathering, and erosion occur. Identify that the destructive forces of erosion and weathering are slow processes that change the surface of the earth. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50832-009	Earth Science Collection: Intermediate Grades	Geographical Features: Landforms	2000	DVD	Combining stunning NASA and live footage with state-of-the-art animation, gives students a clear understanding of the physical features that shape our earth. Terms like escarpment, plateau, butte, outlier, and atoll are shown in their natural states with examples highlighted on an animated globe. Learn the names of these landforms and where they are found. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50832-010	Earth Science Collection: Intermediate Grades	Geographical Features: Bodies of Water	2000	DVD	From the largest bodies of water — the oceans — to tiny streams and tributaries, students recognize the diversity of naturally occurring sources of water. Stunning NASA and live footage show seas, bays, lagoons, and other bodies of water, while examples of their locations are highlighted on an animated globe. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction/ Oceans. Produced by Mazzarella Productions	\$47.95
SchoolMedia, Inc.	P50832-011	Earth Science Collection: Intermediate Grades	Trash and the Environment	1998	DVD	Take a trip to a recycling center, a landfill, and a town dump to understand what happens to trash and garbage after it is thrown away. Focus on the environmental problems created by solid waste and discover ways to alleviate the problem. Learn that through daily conservation methods, people can control the amount of waste they produce. DVD features include on-screen teacher's guide and vocabulary plus chapter selection. Produced by Mazzarella Productions.	\$47.95
SchoolMedia, Inc.	P50832-013	Earth Science Collection: Intermediate Grades	The Water Cycle	2003	DVD	With the help of Luke Warm, a weatherman on the water channel, two young baseball players come to understand why the big game might be rained out as they are introduced to the key elements that make up and affect the water cycle. They discover the process by which the Earth's water supply has been recycled over millions of years, centering on three stages: evaporation, condensation and precipitation. They follow the trail that water takes after it falls from the sky and passes through each of these three stages. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50832-014	Earth Science Collection: Intermediate Grades	Rocks: The Solid Earth Materials #2	2000	DVD	Travel deep inside the Earth to discover how rocks and minerals are formed, to learn about the three types of rock, and to understand how rocks change over time through weathering and erosion. See the entire rock cycle and learn how geologists determine the properties of rocks. Learn about the structure and composition of minerals. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Introduction to geology (3) Rocks (4) Minerals (5) Gemstones (6) Rock formation (7) Weathering and erosion (8) The rock cycle (9) Review and Conclusion.	\$47.95

SchoolMedia, Inc.	P50793-009	Community Collection	Community Rules and Laws	2005	DVD	Show children that rules are the foundation of civilized society and that everyone benefits from following rules. This program includes rules in the home, at school, and in the community. Discover what can happen when people disobey rules and learn that laws are rules that people must obey. See how laws are created through voting and electing public officials, and understand what the community does to those who break the law. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Family rules (3) School rules (4) Community Rules (5) It is important to follow rules (6) Laws (7) Government (8) Different kinds of government (9) People help the government make laws (10) People must follow the laws (11) Review and conclusion.	\$47.95
SchoolMedia, Inc.	P50793-010	Community Collection	Neighborhoods: Understanding Where We Live	2001	DVD	With the help of our local postman, students learn that a neighborhood is a place where families live, play, work, and that schools, police and fire stations, shopping areas, parks, and homes are all located there. The postman helps us recognize that families live in many kinds of homes, that they all have addresses, and that the addresses have two main parts: a street name and building number. While some of the examples are U.S. oriented, the basic concepts presented can easily be adapted for use in Canada. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Neighborhoods as part of communities (3) What is a neighborhood (4) What is a neighbor? (5) Families and homes in neighborhoods (6) Different kinds of homes in different kinds of neighborhoods (7) Addresses (8) Maps and review.	\$47.95
SchoolMedia, Inc.	P50793-011	Community Collection	Communities Around the World	1993	DVD	Compare and contrast the everyday lives of people around the globe, and learn that while people may eat different foods and wear different clothes, they all have things in common. Realize that people around the world meet their needs in ways that make sense in their culture. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) Our world (3) language (4) Africa (5) Asia (6) England (7) South America (8) Mexico (9) Review.	\$47.95
SchoolMedia, Inc.	P50793-012	Community Collection	How Communities Grow and Change	2005	DVD	Learn how natural resources provide work for people and help communities grow. Visit communities that depend on farming, coal mining, oil, gold, trees, etc. See how these cities can boom and then bust when resources are depleted or when demand falls. Learn that many large cities developed where the land was livable and where it was easy to transport goods. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction(2) Another community grows and changes (3) Utilities (4) Animals (5) Tourism (6) Astoria (7) Review (8) Communities without people (9) Recap.	\$47.95
SchoolMedia, Inc.	P50793-013	Community Collection	How Communities are Alike and Different	1996	DVD	Discover that all communities — big or small and in different areas — have things in common. Learn that people in a big city might work in a factory while a person who lives in a small mountain town might make a living by logging. Learn that many children in a farming community belong to 4-H and show animals at fairs for fun, while children in the city might go to museums or amusement parks. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) How are communities alike? (3) Communities are different sizes (4) Communities can be in different places (5) Review.	\$47.95
SchoolMedia, Inc.	P50793-014	Community Collection	Citizenship in the Community	2003	DVD	This program examines the responsibilities of all citizens to make each community the best it can be through community involvement. Students learn the ins and outs of what a citizen is, and find out what it takes to be a good one. They will also get tips on how they can get involved as good citizens at home and in their community, and they will explore one of the most valued rights of a citizen — the right to vote! DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Introduction (2) What is a community (3) Citizens have rights (4) Citizens have responsibilities (5) Citizens follow the laws (6) A good citizen (7) Citizens are patriotic (8) Citizens volunteer (9) Review.	\$47.95
SchoolMedia, Inc.	P50793-015	Community Collection	City, Suburb, and Rural Communities	2002	DVD	People live, work, and have fun together in many different kinds of communities. With the help of three children, students learn about the likes and differences of neighborhoods in the city, suburbs, and rural communities. We join each child as they show us what it is like to live in his/her neighborhood. Schools, stores, and play-time activities are presented in each type of neighborhood. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) Types of Communities (2) Life in the City (3) Life in the Suburb (4) Rural Communities (5) Compare and Contrast.	\$47.95

SchoolMedia, Inc.	P50793-016	Community Collection	Transportation in and Between Communities	2004	DVD	Extraordinary footage helps students see transportation as a means of bringing the different communities of the world together. Students learn how people and goods are moved from one location to another. Different modes of transportation are presented, and we learn that transportation can be used not just for work but also for fun, such as in canoes or on roller skates! The use of different means of transportation in different rural and urban communities is explained. DVD features include on-screen teacher's guide and vocabulary plus chapter selections: (1) What is transportation (2) History of transportation (3) Cars (4) buses (5) public transportation (6) Trains (7) Trucks (8) Garbage trucks (9) Airplanes (10) Boats (11) Emergency vehicles (12) Transportation home (13) Other forms of transportation.	\$47.95
SchoolMedia, Inc.	P51651-002	Beginning Maps: Models and Places	Beginning Maps: Models and Places (DVD)	2005	DVD	Students discover the relationship between the real world, small models of real locations and the purpose of maps. Engaging models of a neighborhood, school and face become "maps" before their eyes. Information on the models corresponds to simple maps with special attention given to relative location and scale. A globe is a view of the world from high above. Students distinguish between water and land on a map and on a globe. They also identify places on the map from stories of the past i.e., where Columbus landed and today like where the President lives. (1) Introduction (2) Beginning Maps: Models and Places (3) Models and Maps (4) Maps and Globes (5) Finding Places on the Map (6) Review	\$35.95
SchoolMedia, Inc.	P50809-002	American Heritage Series	Early Explorers: The Age of Discovery	2004	DVD	Venture into the unknown with young Diego as he follows the footsteps of his ancestors as they explore the New World of the Western Hemisphere. The voyages across the fearsome seas and the arduous treks across the rugged landscapes open a new world to Diego as it is related to him in a letter from another explorer, his NASA astronaut father. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50809-008	American Heritage Series	Early Settlers: The Era of Colonization	2004	DVD	Students witness colonial life in a new land as Annabel Lee Sloan, with the help of her diary, reminisces about the wonderful homecomings she had with her father when he would return from his many travels and reveal to her the fascinating tales of a new and ever-growing nation. We travel from the ports of New England to the lush fields of the South-and everywhere in between-so that we may witness the politics, economy, and culture of a new people and a new land. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50809-009	American Heritage Series	Pioneers: The American Frontier	2004	DVD	With the help of Lester Conrad, a pioneer scout, students learn who the pioneers were, experience life as a pioneer, and travel along with pioneers as they leave the crowded cities in the East through the frontier to a better life in the West. Relive the journey through the hardships, sacrifices, accomplishments and glory of the pioneers. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50809-010	American Heritage Series	Immigration to the United States: American Heritage Series	2004	DVD	Revisit America's history of immigration via the correspondence between young Mai in China, and her Grandfather who lives halfway around the world. Follow the trail of letters as grandfather allays Mai's fear of the unknown. He answers her many questions about America's history of immigration. The stories of hardships endured by the immigrants are tempered with the rewards of living free and the impact they made on the greatest cultural 'melting pot' in the world. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50809-011	American Heritage Series	Native Americans: American Heritage Series	2004	DVD	Experience the rich history of the Native Americans through the eyes of young Suzy Redhawk as she recounts the stories told to her by her wise grandmother. From the rocky northwest coastline through the desert mesas, across the Great Plains to the eastern woodlands, Suzy visits each magnificent tribal culture as they commune with nature and provide valuable lessons in life. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
SchoolMedia, Inc.	P50829-005	A Closer Look at Space Science	A Closer Look at Earth	2004	DVD	From above and below the surface, students take a closer look at what makes the third planet from the sun so special. They learn to read clues to earth's history in eras, plates, and core structures. They witness the forces that constantly change the surface features, like weathering, erosion and volcanic activity, and they see what our planet is made of. Spectacular NASA footage and lively animation will pique students' curiosity. DVD features include on-screen teacher's guide and vocabulary plus chapter selections.	\$47.95
